

## TECHNICAL INFORMATION FOR AIR TRAVEL

# Standard red

### Our necessities or requirements when travelling by air are the following:

**Luggage:** We need to check in 6 regular, standard suitcases of 20 kg each.

**Red carpet for on the floor:** the organization must provide red carpet, which will be used as a floor of the stage.

We need 18m. x 2m. The cutting and sticking will be done by us, so as to create a circus ring of 6m in diameter.

**Floor:** flat, smooth and even.

**Stage size:** Round, 7 meters in diameter x 4 meters high, without any obstacles.

**Sound:** The organization must provide all the necessary sound equipment, in line with the place where our show will take place, with a 3.5 mm jack connection.

**Lighting:** In case it is a street performance in the evening, the organization must provide all the necessary lighting. If the show is represented in a theatre, please contact us for a lighting work plan.

**People on tour:** 2 actors for outdoor performance; 2 actors and a technician for indoor/theatre performance.

**Setting up:** 2 hours and 30 minutes (outdoor/street performance) / 5 hours (indoor/theatre).

**Striking the set:** 45 minutes (outdoor/street performance) / one and a half hour (indoor/theatre).

**Chairs for the audience:** For street performance we recommend about 200 chairs, which will be placed in a circle, around the setting. Theatre or indoor shows can be done frontal, facing the stalls, but if there is enough space, the circular performance might be maintained, with chairs on the stage.

### Other requirements:

- There must be at least one person from the organization on the spot while mounting, during the actual show and while dismantling.
- Access for a van to the place where the show is going to take place and a parking place nearby.
- A bathroom and a room with electricity and water, to be used as a dressing room, near the place of performance.
